### Prizes Accepted

The Canadian National baseball club held a meeting Thursday evening of last week, with President Waters in the chair. The offer of a silk shirt from McNair Bros., to the Mirror player making the first home run was accepted, as was also a silver cup donated by Andrew Common, to the player making the most home runs during the season.

J. F. Baugh was appointed chairman of a committee for the month of June to raise funds for the club.

Carl McCormack was appointed press reporter.

### Important Meeting

Don't forget the meeting of the Mirror Board of Trade tomorrow (Thursday) evening in the town hall at 8:30 o'clock. The proposal to open up the road from Mirror to Buffalo Lake will be the chief item of discussion.

Sidney Grimble, of the Montreal Trust Co., Edmonton, was in town today (Wednesday).

## "MY, BUT YOUR LOOKING WELL!"

Of course, he was—because he was well dressed. He wouldn't have been greeted with such a remark had he been dressed in an ill-fitting, cheap-looking, hand-me-down suit. Clothes DO make a difference. Tinker, Tailor, Soldier, Sailor, Rich Man, Poor Man, Beggar Man, Thief, Doctor, Lawyer, Merchant, Chief. It doesn't matter what you do—the right kind of clothes will make you do it better. And when a friend meets you, shakes your hand, and says, with that pleasing tone of admiration, "My, but you're looking well"—you know you are collecting interest on your clothes investment.

## MIRROR PLAYED ERRORLESS GAME

Mirror's undefeated Canadian National baseball team added another victory to the string last Monday evening, when they played without an error and beat the Camrose nine by the score of 5 runs to 1. Mirror chalked up four runs in the first innings by timely hitting and an error or two on the part of the visitors. It was a disastrous innings for Camrose. Pete Ryan, second man up hit for the first home run of the season and incidentally won the silk shirt donated by McNair Bros. C. Ray then made first. Turner came along with a three-base clout, scoring Ray. Lapp was hit by the pitcher, stole second, and when Wagness connected for a two-base hit, Turner and Lapp trotted home. Mirror gathered in the fifth run in the second innings. Mirror made a double steal in the fifth.

Camrose saved a shut-out in the fifth innings, when they earned their one tally by hits. After the first innings the Camrose team seemed to find their bearings and the game developed into a real contest, and the visitors gave the locals a good game. Basher, playing short for Camrose, accepted many chances without an error.

The Mirror team was there in the pinches and the infield played big league ball, while the outfield had nothing to do. Lapp's throw to first, the quick reaching distances of first, the Mirrorists also fattened their batting averages.

Camrose: Basher rf; Basher ss; Oldstead 2b; F. Adams 3b; Hanson c; J. Hanson lf; Hanson p; Hanson 1b; Nelson, Hanson 2b; Ryan 1b; Wagner ss; Walker 2b; Turner p; A. Ray c; C. Ray cf; Cairns rf; Hanson lf.

Strike-outs, Turner 10, Hanson 2; stolen bases, Mirror 1; Camrose 3; left on bases, Mirror 8, Camrose 5. Umpire, G. Bergquist, Bashaw.

Next game—Ponoka at Mirror, Thursday, June 5th, at 6 p.m., sharp.

Mirror at Red Deer on Tuesday, June 10th.

Clive at Mirror on Friday, June 13th.

### Cars Wanted For Saturday

A school sports day will be staged in Alix on Saturday, June 7th, and pupils from Mirror, Bashaw and Alix will take part in the program.

Two baseball teams from Mirror and the girls' basketball team will compete, and a number of the pupils will also try for honors in the athletic events.

Nearly all the pupils from Mirror are anxious to attend the sports, and if there are any car owners in Mirror who can arrange to take a load of children to Alix on Saturday, they are asked to communicate with Principal Baugh, who has the arrangements in hand. Sports commence at ten in the morning, so that a trip could be made before that hour, and the car owner return for the children later in the day.

Let's have enough volunteers to get all the "kids" to Alix.

### Masonic Service

Ancient Landmark Lodge No. 109, A. F. & A. M., will hold its divine service in the lodgeroom on Sunday afternoon, June 8th, at three o'clock. It was announced last week that V. Archdeacon Hayes, of Calgary, would conduct the service, but owing to illness he is unable to attend, and Rev. Mr. Marsh, Rector of Claresholm, will take charge of the service. An invitation is extended to the public to attend.

## 1924 RATE 25 MILLS ON THE DOLLAR

The regular monthly meeting of the village council was held in the secretary's office on Monday evening, June 2nd, 1924, at the hour of 8:30 o'clock in the evening.

All members except F. Smithers present.

The minutes of the meeting of May 12, were read, approved and adopted upon motion of Messrs. Irwin and Thomas.

The following accounts were presented:

Hodgson, P. P., taking out wooden crossing and moving hitching post..... \$3.00  
5 nights at hall..... 5.00  
1 dog tag collected..... .25  
Spice & Son..... .25  
Attorney-Gen., to Theo. Pederson, Mar. 31, 1924 15.50  
Alta. Govt. Telephone..... 2.50

Thomas—Irwin: That accounts as presented be paid.

At estimate of expenditures was presented for 1924 and finally accepted.

A statement of assessment was also presented showing a total assessment of paid-up lots at \$34,461.00, and on lots in arrears and not yet forfeited of \$27,468.00.

Irwin—Thomas: That a rate of 25 mills be struck and that secretary be authorized to levy and collect same.

Thomas—Irwin: That a discount of 10% be allowed on all taxes paid within 30 days of demand thereof.

Irwin—Thomas: That application for restaurant licenses by Margaret Knowles and Mrs. H. H. Creston be approved.

Thomas—Irwin: That A. R. Hopkins be authorized to repair Lacombe road near the railway track.

Irwin—Thomas: That P. P. Hodgson be hired to add another section to the hitching rack.

Thomas—Irwin: That secretary ascertain from Reeve Jewell as to whether village can have use of 3 freeways to grade Lake street.

Irwin—Thomas: That Mr. Thomas be authorized to make arrangements for having road graded on east end of Lake street and that he be authorized to hire a foreman to look after same, and three four-horse teams with drivers, the rate of pay to be \$4.50 per day for foreman; \$3.50 per day for drivers, and \$2.50 per day for each team.

Thomas—Irwin: That E. Irwin be authorized to hire someone to remove brush from Lake street immediately, the rate of pay to be \$3.50 per day.

Meeting adjourned.

### St. Monica's Church

Holy Communion will be observed at St. Monica's Church, on Sunday, June 8th, at 9 a.m. Rev. Mr. Marsh, of Claresholm, will conduct the service.

### Annual U.F.A. Meeting

The annual meeting of the Buffalo Lake U.F.A. Co-operative Livestock Shipping Association will be held in Alix on Tuesday, June 17th, at 10 a.m. All U.F.A. locals in the district are requested to send one representative for every ten portion tickets or a major portion thereof in their locals.

Attend the baseball game tonight (Thursday) between Mirror and Ponoka. Game starts at 6 p.m.

Miss Enid Rayner, of Narman, B.C., is visiting for a few days with Mr. and Mrs. H. W. and the Misses Panrucker.

Alix school team defeated the Mirror Maple Leafs on Tuesday evening on the local diamond by the score of 9 to 5.

### Buildings Bought

C. H. and G. J. Estell have purchased the old Lamerton Mercantile store building at Lamerton, and will move them to their farm one and a half

## Cipps Have Many Uses

IN THE GARDEN, you use them for shrubs, plants and vegetables. For young plants simply dissolve one pill to each pint of water you sprinkle over the beds.

IN THE HOUSE, for potted plants, Cipps are used to special advantage because heretofore no fertilizer suitable for this purpose has been obtainable. One pill per plant—per month.

FOR SHRUBS, again you will find Cipps especially suited. They contribute wonderfully to large, healthy blooms, healthy growth and vigor.

AND FOR CUT FLOWERS, CIPPS actually double the length of life. One pill per pint of water in the vase—and the result is truly wonderful.

WE HAVE THEM IN STOCK

miles north. Both buildings are 34x30 feet, and the one which stood on the south side will be converted into the dwelling, and the other one into a mark from the old trading house. Work on the basement point of Lamerton, and old will be proceeded with as soon as the foundation of the buildings on the south side of the road.

## Municipal Hail Insurance

HAIL INSURANCE is not a side line with us.

We specialize in it alone. We now operate in every organized municipality in the Province, and during the five years that the present plan has been in existence, we have written a greater amount of hail business than all the Old Line Companies operating in Alberta put together. This speaks well for the service we have given. If we please others, we can please you.

## PROTECTION AT COST YOU PAY NEXT WINTER

## BRITISH GOVT. HAS MAJORITY ON A DIVISION

London—By what may, under the circumstances, be regarded as a quite comfortable majority, the Labor Government again succeeded in resisting an attack on its existence, when Sir William Beveridge's motion to reduce the salary of the labor minister, Tom Shaw, by £100, was rejected after a long debate.

The motion was merely a technical way of expressing disapproval of the government's policy respecting unemployment and a similar motion was talked out in the House recently. Prior to the recording of the vote, Premier MacDonald declared that in the event of a government defeat, Labor would go before the country in a general election.

In the division, the vote stood 209 to 222 in the government's favor. H. H. Asquith, the Liberal leader, having announced that his party would not vote against the government.

There were lively scenes of jubilation and counter-demonstration when the vote became known and shouts of "where is Lloyd George?"

Mr. Lloyd George attended the Liberal meeting to decide upon what action should be taken on the vote, but had not returned to the House when Mr. Asquith announced the decision of his party, and the speaker provoked a squall of a split among the Liberals.

The figures of the division showed that 100 Liberals voted with the government, and 26 abstained from voting.

No doubt exists among well-informed political observers that the Conservative wing of the Parliamentary opposition is quite ready to vote the government out of office at any moment.

This, however, is not the state of affairs in the Liberal wing because in the recent by-elections the Liberal candidates fared so badly that the party does not dare to risk an appeal to the country at the present moment. This situation explains the proceeding in the House.

Prime Minister MacDonald, in defending his labor minister, did not trouble to outline any real programme of reform, or to give the ball that he has always done in previous speeches.

## No Financial Aid From Ottawa

Proposed Indian Trip For British Tars May Be Cancelled

Vancouver—Plans of the civic committee for the reception to the special service squadron of the British fleet here next month have been abandoned, what of a job when wires were received from Ottawa that the Dominion Government would accept no responsibility for plans of entertaining the fleet other than the two smoking concerts which it had previously agreed to give the men at Vancouver.

It had been the understanding by the committee that the federal authorities would give 240 men and 40 officers a trip to the interior as far east as Winnipeg. All points between Vancouver and Winnipeg were greatly interested in this visit and were preparing welcomes, but the wire from Ottawa stated that the government recognized no responsibility in this connection.

The provincial government has made a grant of \$2,000 toward the reception and the Vancouver city council has voted \$4,000.

For Prohibition Enforcement  
Washington—A brand new Congressional investigation, directed at prohibition enforcement, was determined upon by the House Judiciary committee. The committee designates a sub-committee, with instructions to go into line of the liquor law and to investigate rum smuggling and charges of abuse of the present system.

British Immigrants in Majority  
Ottawa—During the month of April, 19,220 immigrants entered Canada as compared with 2,600 in April, 1923, according to figures issued by the department of immigration. Of these admitted last month, 9,410 were British, 1,238 were from the United States, and 8,682 from other countries.

## Offers Large Grant For Mental Hygiene Research

Toronto—"The Canadian National Committee for Mental Hygiene has received a grant of \$15,000 from the Rockefeller Foundation, for research, experimentation and demonstration in mental hygiene, says an announcement by the committee, on condition that an equivalent amount be provided from Canadian sources for similar purposes." The Rockefeller Foundation also stipulates that studies be conducted for a period of five years in applying mental hygiene principles to school children.

## Brilliant State Ball

Buckingham Palace Is Scene Of Splendor in Honor Of Italian Royalty

London—"The state ball given by King George and Queen Mary at Buckingham Palace in honor of the visit of King Victor Emmanuel and Queen Helena of Italy, was on even a greater scale of splendor than the recent ball tendered their own subjects. The function was the culminating point of a series of entertainments with the visit of the Italian sovereigns.

Large crowds of Italians gathered in the precincts of the palace, where they were entertained with selections of music played by the band of the Coldstream Guards.

The state apartments were beautifully decorated with flowers and shrubs. A guard of honor of the Coldstream Guards were mounted at the entrance of the palace. The ball room presented a dazzling display of jewels, the royal visitors having brought with them the priceless crown jewels of the House of Savoy and also specially made ball dresses, the work of Italian designers.

The guests included large numbers of members of foreign embassies especially the Italian embassy, represented by the duke of Salaparuta, headed by Premier MacDonald, who had with him his daughter, Isabel, and the treasurer of the Bank of Canada.

## Metric Weight System Adopted By Japan

Actual Use Will Be Introduced During July

Tokyo—Japan is preparing to adopt the metric system of weights and measures, and educational propaganda is being directed to the people with the system is being spread under the direction of the department of agriculture and commerce.

The actual adoption of the system will begin July 7. Within five years from that date all government departments, factories, services and schools must substitute the metric system for the present Japanese units of weight and measure.

May Improve British Ports  
London—Schemes for improving the port facilities of the United Kingdom at an estimated expenditure of \$25,000,000 have been recommended by a committee appointed by the Shipping Association, British Chambers of Commerce, and the Federation of British Industries, after a searching inquiry into the matter of the British ports.

India Cannot Have Home Rule  
London—"The British Government is prepared to make any proposals at present toward the extension of home rule to India, it was announced by J. H. Clynes, deputy leader in the House of Commons, in answering a question in the House.

Slain Killed By Bomb  
Karlsruhe, Heilmannstadt—While a review of military commands was in progress here, a bomb fell accidentally from a military demonstrator's airplane into a crowd of spectators. Six persons were killed outright and 19 injured.

Fire At Sutherland  
Saskatoon—Fire of unknown origin completely destroyed the store of H. R. Leitch at Sutherland, Sask. The building was valued at \$14,000, and the stock at \$7,000.

La Follette Promises to Run  
Washington—Senator Robert M. La Follette announces himself ready to run for the United States presidency on an independent ticket.

Sleeping Sickness in Britain  
London—In the last quarter ending March 31, there have been 229 deaths in England from sleeping sickness.

## WESTERN EDITORS

G. C. Duncan, Editor and Proprietor of The Mail, Drumheller, Alberta.

## C. N. R. DEFICIT IS REDUCED BY SUBSTANTIAL SUM

Ottawa—It was in terms of optimism that Hon. G. P. Graham, minister of railways, presented to the House the annual statement of the Canadian National Railways and the Canadian Government Merchant Marine.

He gave comparative results for last year and the year previous.

The deficit had been reduced from \$1,211,877, 1922, to \$2,993,372, 1923, a decrease of \$1,781,495.

After usual deductions and additions involved in taxes, rentals, hire of equipment, etc., total income before fixed charges was:

1922, \$1,584,875; 1923, \$1,499,782; increase, \$1,345,093.

Fixed charges during the year increased from \$60,136,693 to \$64,144,228. The total deficit, after fixed charges, was:

1922, \$2,657,720; 1923, \$2,558,691; decrease, \$98,729.

The Canadian Government Merchant Marine had a deficit last year after all charges, including depreciation and interest, of \$8,365,670. This is an improvement of \$20,808 over the previous year.

Mr. Graham drew attention to the point that as a result of the year's operations, the railways themselves had been able to provide \$1,234,875 (an improvement in round figures over the previous year of twelve million) toward fixed charges due to the public.

Sir Henry Thornton, Mr. Graham had made a deal that restriction of maintenance had played no part in the improvement last year. Mr. Graham suggested for the consideration of the House:

(1) Increase of the board of directors, to have a strong executive of business men, close at hand, could be called together by telephone overnight.

(2) Whether the government should be asked to guarantee equipment securities.

## Increase In Exports

During 1923 Canada's Best Customer Was United States

Ottawa—Canada's best customer during the 12 months ended April was the United States, it having imported Canadian goods to the value of \$429,265,000, an increase over the previous year of \$16,000,000. The merchandise purchased from the United States was \$296,522,000, an increase of \$14,000,000.

Canada's next best customer was the United Kingdom, imports from the United Kingdom were \$102,917,000, an increase of \$7,899,000; exports to the United Kingdom were \$25,350,000, a decrease of \$2,000,000.

Weekly Newspaper Men Go Overseas  
Montreal—Members of the Canadian Weekly Newspapers Association who will undertake the two months' trip to England, France and the United Kingdom after the annual convention which will terminate in Toronto, July 7, now number 174. Members have decided their intention of joining the party from as far west as Dunsmuir, B.C., and as far east as Lunenburg, N.S.

Second Torpedo In South  
Atlanta, Ga.—The second known death toll of the series of torpedoes which swept the south for the second time in a month had mounted to 45 today. Approximately 100 persons are known to have been injured, scores made homeless and property damaged to the extent of more than a million dollars.

## Sale Of Shares Act Is To Be Tested

Winnipeg—Validity of the Sale of Shares Act in Manitoba, Saskatchewan and Alberta will be tested by court action in all three provinces. The action will be brought by the Shareholders' Protective Association of the Northwestern Trust Company, in liquidation. This was the course taken upon when the corporation of the application to settle the list of contributors of the company came up before George Paterson, K.C., master of the Court of King's Bench. An adjournment of two weeks was granted.

Says U.S. Offers To Purchase Death Ray  
Matthews Claims American Government Is Interested In Invention

Paris—Americans have entered the race to obtain the secret of Griffield Matthews' death ray, Matthews claims.

On Great Britain, the inventor's own country, and France in competition for the diabolical invention which, it is claimed, may revolutionize war and make the nation which holds it supreme, Matthews gave out that he had received a written offer from the United States.

Other reports said the National Academy of Sciences at Washington had called the inventor asking particulars, and that American naval attaches here had been ordered to investigate Matthews' claims.

Matthews himself has denied that the United States Government was in any way interested in the ray.

Meanwhile, both French and British claims to have a definite contract with the inventor entitling them to share in the deadly ray which kills at great distances and which is said to destroy machinery and blazes down airplanes in flames, according to Matthews.

## Long Term Credits For Farmers

Dr. Tery, of Alberta, Offers Necessity For Giving Aid to Agriculture

Ottawa—"The necessity for long term credits at uniform rates, under federal control, to permit Canadian farmers to finance their operations," was suggested by Dr. H. M. Tery, president of the University of Alberta, and advisory chairman of the Canadian Council for Scientific and Industrial Research, who was examined by the banking and commerce committee of the House of Commons.

Dr. Tery followed closely the lines laid down in his report on rural credits published by the Federal Government in April last.

He said that in the United States and Canada most of the advocates of the long term credits system were of the opinion that only diversified farming would provide an adequate measure of security for such loans.

In the western states such credits generally were only available to mixed farmers.

London Still Financial Centre  
London—Sir John Aldrich, president of the Council of Commerce, in an interview in the Financial Times, expressed the opinion that New York would never supplant London as the monetary and financial centre of the world.

With the increasing stabilization of exchange, Sir John said, the monetary and financial centre of the world would again turn to London for loan facilities.

Stefansson In Australia  
Sydney, N.S.W.—Vilhjalmur Stefansson, the Arctic explorer, who proposes to explore the wild region of Australia with the idea of ascertaining the possibility of cultivating there, arrived here May 27. He was welcomed by delegates of the Royal Society.

Heads Musical Association  
Montreal—Election of Col. F. J. James, Regina, as president of the Saskatchewan Musical Association and decision to hold next year's annual conference in Regina, were the outstanding features of the annual meeting of the association held here.

Trainsmen Wage Negotiations  
Montreal—"The putting into effect in Canada of the same wage concessions recently put into effect on principal lines in the United States for engineers, firemen, conductors and trainmen, is the sum total of the request made by the executives of the Order of Railway Conductors and the Brotherhood of Railway Trainmen, at a wage conference with the operating committee of the Railway Association of Canada.

Disaster In Bucharest  
Bucharest, Rumania—"The arsenal and ammunition dumps on the outskirts of the city were destroyed by a terrific series of explosions and fire. Enormous damage was done, and great loss of life is reported.

Wins Story Competition  
Toronto—"John T. Salsbery, Victoria, B.C., was the winner of the \$200 L.O.R.E. prize for the best story in the Order's annual competition.

## U. S. Presidential Aspirant

WILLIAM G. McADOO

secretary of the United States treasury under President Wilson and now himself an aspirant for the Democratic presidential nomination.

Radio Messages Sent Printed For Delivery  
Letters As They Appeared On Telegram Form Were Perfect

Montreal—"For the first time in the history of wireless telegraphy at sea, radio messages have been automatically transmitted, and actually printed for delivery to the addressees without human aid. Word to this effect has been received by the local offices of the White Star Dominion Line from the purser of the Olympic in mid-ocean enroute to Cherbourg.

The message states that 80 words a minute transmitting apparatus on the ship automatically sent messages over a distance of 800 miles to the wireless station at DeLiz, England, whence they were relayed to the General Post Office, London.

The message further states that the printed letters as they appeared on the telegram form ready to be delivered to the addressees were perfect.

GENERAL INQUIRY INTO GERMANY'S ARMY EQUIPMENT

Paris—"The Allied Council of Ambassadors has agreed on the terms of the reply it will make to the note from Germany relative to the resumption of the control of German armaments, it was announced here.

The note addresses closely to the original demand of the ambassadors that the transformation of the military control commission into a committee on guarantees, placed at the expense of the allies, must be preceded by a general inquiry into the state of Germany's military establishment, with a complete inventory of its resources.

The note will demand that the future activities of the control authorities shall cover the five categories listed in the preceding correspondence on this subject. These are:

First—"The reorganization of the German police."

Second—"The transformation of munitions factories to pursuits of peace."

Third—"The delivery of the balance of unauthorized war material in Germany's possession."

Fourth—"Delivery of documents relating to the war material on hand when the armistice was signed."

Fifth—"The promulgation of laws to put the recruiting organization of the army in harmony with the terms of the peace treaty."

Gets By Senate  
Ottawa—One Canadian National Railway branch line bill passed the Senate committee on railways, that to provide for a line running 19 miles from Puelles in the province of Saskatchewan.

Disaster In Bucharest  
Bucharest, Rumania—"The arsenal and ammunition dumps on the outskirts of the city were destroyed by a terrific series of explosions and fire. Enormous damage was done, and great loss of life is reported.

Wins Story Competition  
Toronto—"John T. Salsbery, Victoria, B.C., was the winner of the \$200 L.O.R.E. prize for the best story in the Order's annual competition.

## CROP CONDITIONS IN THE WEST ARE FAVORABLE

Winnipeg—Marked improvement in weather conditions throughout the prairie has given a welcome boost to the farmers generally. Despite the lateness of seeding operations and the unusually cold weather during the past month, recent rains and rise in temperature have contributed to rapid growth.

Wheat sowing is completed in the three provinces, with the exception of a few isolated districts, while good progress is reported in the seeding of corn and grain.

Farmers in the Regina district report that crops are slightly ahead of last year, and in some districts wheat has reached the height of three inches.

The season's crop prospects in Alberta are regarded as the most liberal in many years. Showers have been general and germination is assured.

In Manitoba the crop is not much later than in former years, although the lateness of the seeding season materially reduced average yields. There is ample time yet for the development of a good crop, and notwithstanding unfavorable weather conditions during the early spring, "so far need be entertained concerning the crop" declared Prentiss, following a visit through the Neepawa district.

U.S. Has Stiff Problem  
Claim Immigrants Are Smuggled Across Border From Canada

Montreal—Immigrants smuggled by automobile across the Quebec border into the United States are filling New York, Vermont, New Hampshire and Maine jails; organized bootlegging in the area has been uncovered; stiff penalties there are being handed out by United States courts to those caught; and the United States frontier service is strengthening its frontier patrol.

Such is the situation today as outlined by J. B. Clark, United States immigration commissioner in this district, who terms the problem facing the United States, and that judges have the power to impose sentences of this offence of 10 years in the penitentiary and a fine of \$10,000.

Restore Rheims Cathedral

John D. Rockefeller, Jr., Offers One Million Dollars For This Purpose

Paris—John D. Rockefeller, Jr., has placed \$1,000,000 at the disposal of a Franco-American committee for the purpose of reconstructing the roof of the Rheims Cathedral, destroyed by the Germans in the World War, and restoring and beautifying the fountains and the gardens at Versailles.

Mr. Rockefeller is moved to make this gift because, as he said in a letter to the French Police, dated May 2, "among the treasures of which France is custodian, are some which belong to the patrimony of all nations, for their influence is a source of inspiration to all humanity."

Gets By Senate  
Ottawa—One Canadian National Railway branch line bill passed the Senate committee on railways, that to provide for a line running 19 miles from Puelles in the province of Saskatchewan.

Disaster In Bucharest  
Bucharest, Rumania—"The arsenal and ammunition dumps on the outskirts of the city were destroyed by a terrific series of explosions and fire. Enormous damage was done, and great loss of life is reported.

Wins Story Competition  
Toronto—"John T. Salsbery, Victoria, B.C., was the winner of the \$200 L.O.R.E. prize for the best story in the Order's annual competition.

# Financiers Are Advised To Retain Their Confidence In Future Of Western Canada

"We may be a Federal Government, but we are not British," and we welcome the co-operation of financial interests in the work that is before us," declared Premier Bennett in an address to members of the Dominion Mortgage and Investments Association at their annual meeting in Winnipeg.

"We want the financial interests to retain their confidence in Western Canada, and we assure them that we are not acting in the interest of any one class, but for the people as a whole," the Premier added.

Premier Bennett reviewed the conditions in the province of Manitoba, and stressed the importance of diversified farming. Seventy-five per cent, he said, is difficult to get out of the land were kept there. He believed, like Joseph of some thousand years ago, that in "fat years" the farmers should build up a reserve against "lean years" to come.

All speakers stressed the great necessity for diversified operations and the relation of crops, and the importance of lower production and transportation costs to the farmers of Western Canada.

Farming needed ordinary business application, said R. H. WILKS, M.L.A., a practical farmer, who delivered an optimistic address. He suggested the financial interests should make it their business to take to the immigration problem. The thing to do was to bring good people and settle them on the improved farms, and he suggested that the loaning companies must have a plan to get the farms that they could afford to sell at very low prices.

Industries in the country should be encouraged because more industries were essential, said Mr. Wilks, who favored the retention of duty on agricultural implements. He thought it was either the price or the duty on agricultural implements that kept farmers poor, but much more they had the lack of looking after their machinery.

White farming had not proved such a "bad job," Mr. Wilks declared, there was far too wide a distance between the production price and the price charged the consumer, but he would not complain if the consumer got the benefit. In conclusion, Mr. Wilks said:

"We don't become millionaires, but no other life equals that of the farmer free from debt and worry; and you that see a farmer who has never mortgaged his farm and I'll show you a man who isn't worrying about his taxes." Incidentally, Mr. Wilks said that he had never signed a note for anything he had bought and that he had never mortgaged his land.

Professor C. H. L. Laidlaw, president of the Manitoba Agricultural College, believed the greatest unhappiness was to find a farmer more than he ought to have, and declared a further development of mixed farming was absolutely essential. Hundreds of western farmers had been driven to Canada to get away from farm drudgery, but were finding out it was impossible to escape work on a farm and be successful.

J. C. Haney, superintendent of the demonstration farm of the International Harvester Company, Grand Forks, N.D., was another speaker who advocated mixed farming. "When the changes to diversified farming have properly well returned," he declared.

## Building Fairly Active

The total value of Canadian construction for the month of April, according to Maclean's Building Reports, Limited, was \$34,194,500, the record with \$11,541,500 in March and \$30,842,500 in April, 1923. Residential building accounted for 21.5 per cent. of the April total amounting to \$55,536,500. Business building amounted to \$21,123,000 or 30 per cent.; industrial building \$16,611,000, or 12.2 per cent.; and public works and utilities \$7,888,000, or 22.2 per cent.

## Cught More Fish

Canada's catch of sea fish in March, 1924, increased seven-fifths per cent. over the same month last year, according to official figures. In March, 1924, 15,225,528 pounds of fish were caught, valued at \$76,590, compared with 12,450,000 pounds, valued at \$62,250, in March, 1923. The increase was chiefly in cod, halibut, salmon, clams and lobsters.

Duddy—"Can you tell me why the little hand of my watch goes faster than the big one?"

Johnny (after considering gravely):—"I think, Duddy, it must be for the same reason that I don't run when I am well, but when I am sick."

## Grain From Vancouver

### 326 Ships Leave Vancouver With Wheat From Prairie Provinces

Grain exports from Vancouver this season reached a record high point recently. Since September last, when the 1923-24 season opened, to March 31, there have been 125 deep sea ships loaded with wheat for United Kingdom or Europe. About 100 of these loaded coal cargoes. Some of them are repeat charters, others are liners.

To the Orient seventy-five departed during the period and thirteen to South America, Central America, Mexico and New Zealand. All told in March 31, a fleet of 256 deep sea ships departed from Vancouver with wheat from the prairie provinces.

The month of May will see another twenty-five deep sea ships laden with grain out of Vancouver, the bookings for the month being about 2,500,000 bushels. June is expected to see 2,000,000 bushels moved. By the end of May the rail season expects the port to have loaded some 25,000,000 bushels for the season.

## Alberta Coal Mines

### Interest Welsh Owners

#### Convinced Eastern Canada Can Be Supplied With Western Coal

Convinced Eastern Canada can be supplied with Western coal, the Welsh owners of the immense coal resources of the province of Alberta with the ultimate aim of supplying the fuel needs of Eastern Canada and other parts of the country, is a project which is now occupying the attention of a group of Great Welsh mine owners. Represented by the month being about 2,500,000 bushels. June is expected to see 2,000,000 bushels moved. By the end of May the rail season expects the port to have loaded some 25,000,000 bushels for the season.

Major S. J. Robins and Captain Henry Davies, O.B.E., both of Cardiff, Wales, have been to Edmonton after some months of extensive travel and inspection of the mining properties of the west.

Thoroughly convinced of the feasibility of supplying both Quebec and Ontario with western coal, saving the \$100,000 which the Dominion has now sent to the United States in coal trade, Major Robins and Captain Davies have obtained the British Canadian coal area in Alberta, held by individual and small companies, who have not sufficient capital to carry on development.

## Mexican Cow Pony For Prince

### Prince of Wales Will Be Presented With Valuable Pony By U.S.

Cow Punctures The Prince of Wales is to have an opportunity to ride a typical Mexican cow pony. United States purchasers who are to participate with a number of rodeo riders from the Canadian west in the rodeo at the British Empire Exhibition have decided to the British candidate a good coal area in Alberta, held by individual and small companies, who have not sufficient capital to carry on development.

## Development In Northern Ontario

### One of the Principal Mining Areas of the World

Following a recent inspection made of the Timiskaming and Northern Ontario Railway system, Lieutenant Colonel L. T. Martin, D.S.O., one of the commissioners of the railway, states that development in every line continues in Northern Ontario, particularly in agriculture and mining. He said that the province is one of the principal gold, silver and cobalt producing areas of the world and recent reports of prospectors and mining companies indicate the possibility of copper being found. Colonel Martin is optimistic of the future of Northern Ontario.

## Prospects For Swedish Immigration

J. Elander, of Stockholm, Sweden, is touring across Canada to study immigration problems with regard to new Sweden coming over. Mr. Elander, who visits a newspaper, is very gratified at the warm welcome which Western Canada gives to Scandinavian settlers. He returned recently shortly from the coast over Canadian National lines.

Both the Admiralty and the War Office have to make provision in their estimates for the maintenance of three cat's paws, which are required to be attached to a permanent staff for duty. The son for official cat at the Admiralty is one named Jim, which has rendered 20 years' service.

## Power Running To Waste

### C.P.R. Investigating Waterpower Resources of Alberta and B.C.

Probably the best use that can be made of the large projects engaging the attention of the C.P.R. directors is that of developing its lines through the Rocky Mountains. Engineers are working out the details of the proposal, and if they show that money would be saved the cost and old burning engines are likely to be replaced by the kind that draws its motive power from a cable.

To the moment the possibilities of developing power from the mountain streams in this and the neighboring provinces would seem to be almost limitless. Whether they are so situated that they can be made economically to pull the trains of the transcontinental is another matter. In any event, the fact that the C.P.R. is seriously considering the practicability of the scheme must draw attention to the enormous energy that is running to waste every day in the year as the snows melt on the higher levels and percolate water down the slopes of the big hills.

Cheap energy derived from water-power has made Quebec one of the greatest industrial provinces in Canada. In the Maritime Provinces streams of small volume and with little fall are made to drive mills, light plants and factories. The Niagara power development is known the world over. There is probably more power in the molting glaciers of the Rockies than there is in the rivers of the rest of Canada, not excluding the St. Lawrence, which empties into the western fringe of Alberta are due some day for a remarkable industrial development, based upon the utilization of these picturesque but presently useless streams. If nothing more comes of it, the fact that the C.P.R. is paying engineers to find out whether it would be profitable to harness some of them and use the energy to run its trains must direct attention to that tremendous untapped source of power—Edmonton Bulletin.

## Catways Make Good

Less than two per cent. of the 20,000 boys and girls from the Dr. Barnardo's Homes in England, who have been sent to Canada and America, have been failures. These children come from the most densely crowded and destitute area of the United Kingdom, and every one was a success.

## Fruit For Western Canada

In an effort to develop fresh fruit markets from the Columbia Canal in Western Canada, the Purvis (Pacifi) Line has brought a sample shipment of bananas. The fruit arrived at Vancouver in good shape.

Individual and tribal property of American Indians is estimated to be worth \$75,714,287.

The British Columbia Coal Area in Alberta, held by individual and small companies, who have not sufficient capital to carry on development.

## Development In Northern Ontario

## Canada's Substantial Advantages

### Canadian Farmer Has Many Advantages Over Farmers in U.S.

In his recent report on the wheat situation made to President of the United States, Henry C. Wallace, secretary of the United States Department of Interior, states: "The Canadian wheat farmer enjoys substantial advantages over the American producer in the matter of yields, land values, the quality of wheat he produces and lower freight rates from points equally distant from markets. The yield of wheat is materially higher in Western Canada than in many of the wheat producing states of the United States. The average yield of spring wheat in the prairie provinces during the ten year period 1915-1923 varied from 15 to 16 bushels per acre in Minnesota, North Dakota, South Dakota and Montana for the corresponding period they ranged from 10 to 11 bushels. These figures do not reflect the losses resulting from abandoned acreage."

"The capital invested in land is also materially less than that in the United States," states Secretary Wallace. The average value of farmland in 1923 for Canada as a whole was 240 acres as compared with \$70 for the United States. In the prairie provinces of Canada average land values ranged from \$23 to \$25 an acre. In clay of the western wheat states the range was from \$124 to \$110. It is evident that the American wheat farmer has a much heavier per acre investment in land. It is quite apparent that the Canadian farmer has a much heavier per acre investment in land. It is quite apparent that the Canadian farmer has a much heavier per acre investment in land.

## French Peasants May Stop Growing Wheat

### Academy of Agriculture Told Too Much Being Imported

The Academy of Agriculture told too much being imported. Joseph Heller, member of the Academy, pointed out that there were 100,000 quintals of wheat now available on the markets furnished by the United States, Canada, Australia and Argentina. Of this quantity, he estimated, only 65,000 quintals would be absorbed by the world's consumption, leaving more than 35,000 quintals left over at the time of the next harvest.

Mr. Heller expressed the fact that if no more wheat were to be imported, the importation of wheat into France, prices at the next harvest time would drop sharply, would injure the French farmer and would cause them to cease planting.

He urged the Academy to make strong representations on this subject to the new government.

## MINAKI, THE BEAUTIFUL COUNTRY

### Locally with a moon shining through the trees, there is a new charm—the charm of resting nature, when the air laden with the tang of spruce, one rests easily and hears the ripple of the Winnipeg River against the shore.

Minaki has charms for the holiday-maker whether he or she seeks bathing, boating or fishing or just simply beautiful rest. Place are plentiful, and Minaki is a place where all the big river does not get away; extended water trips by canoe or motor boat may be had at leisure and there are sandy beaches for sunbathers. In addition there are tennis courts, golf course, dancing pavilion, and other attractions, so that no matter what the visitor's tastes may be, there is something to appeal to Minaki.

# Foster Draws Attention To Operations And Activities Of The League Of Nations

## Alberta Coal Resources

### Welsh Mine Owners Propose to Develop Western Mines on Scientific Principles

The development of the immense coal resources of the province of Alberta, with the ultimate aim of supplying the fuel needs of Eastern Canada and other parts of the country, is a project which is now occupying the attention of a group of great Welsh mine owners. Represented by the month being about 2,500,000 bushels. June is expected to see 2,000,000 bushels moved. By the end of May the rail season expects the port to have loaded some 25,000,000 bushels for the season.

## Dairying in Manitoba

### Wheat Crop In 1923 Only Double Dairy Production

Manitoba, according to Premier Bracken, no longer carries all its eggs in one basket. Although wheat is still Manitoba's most important crop, its value in 1923 was only twice as great as that of dairy and allied products. Since 1912 the value of creamery butter produced in Manitoba has grown from \$1,000,000 to \$11,000,000. Dairy butter in the same period increased in value from \$1,000,000 to \$9,000,000. In two years Manitoba has developed from an importer to an exporter of dairy products.

## Greatly Improved Yields

### To protect lamb crops from the danger of being suffocated through accidental imprisonment in vaults fitted with time clocks, the hotel hands now equip their vaults with electric lights, oxygen tanks, a telephone and instructions saying what a person accidentally locked in should do.

## Victories to the British Museum

### Recently have been cleared of several Chinese portraits of a woman painted upon silk, which, though more than 70 years old, retain its vividness.

## A woman that moves by steps made by the alternate broad thrust of its body has been invented in Germany.

## Some Questions and Answers in Connection With Forestry Work

### Q.—To what extent are aeroplanes being used this season for forest protection?

A.—The Ontario Government will be a heavy user, with thirteen planes in the forest protection squadrons organized districts. In this area canoe patrols will be discontinued and the general ground force reduced. A few machines may be used in British Columbia. Manitoba will probably maintain a few machines working out from Roberval and three other air stations.

## Q.—I have heard that hundreds of ten and twelve-year-old children in Southern Alberta and Saskatchewan have put to rest their first tree.

A.—It is true. Lecturers of the Canadian Forestry Association were their first tree. One out of 24 senior school children only five had ever seen a tree of any kind. These same lecturers showed many pictures in Western Canada. Their first mission pictures and gave them their first photo performance.

## How The New Testament Came To Us

(Contributed)  
(Continued from last week)  
Our chapter divisions are the work of Stephen Langton, early in the thirteenth century. Robert Stephens in 1550 made the verse divisions we now use while riding on horseback between Paris and Lyons. The Bible of 1601 was larger than ours it contained the Apocrypha placed between the Old and New Testaments. The Council of Trent, 1546-1562, the Roman Catholic Council consequent upon the reformation upheaval, decreed the

Apocryphal books canonical for Protestants, then the books commonly called apocrypha, not being of divine inspiration, are no part of the canon.

Since the 1611 version many manuscripts then covered with the dust in ancient monasteries have been brought to light. In 1659 the monastery of St. Catherine at Mount Sinai revealed an old Bible wrapped up in a tablecloth. Today this is known as Codex Sinaiticus. In 1859 one of the art treasures restored to Rome was the Codex Vaticanus after it had been taken to Paris by Napoleon. It is generally regarded as the best text and next Codex Sinaiticus. In 1026 Codex Alexandrinus now in the British Museum was the gift from the Patriarch of Charles the First of England. It is important to note it was discovered after the King James Version. Then another, Codex Beza was given to the University of Cambridge by Theo. De Beza in 1581 but its value was not known until after 1811.

As the authorized version was begun by the Church of England so the revised version was properly initiated by the Church of England in 1881. All English speaking denominations were invited to take part. The best text for the new translation was by Canon Westcott and Rev. E. A. Hort. Since 1881 there have been several new Bibles. A piece of papyrus was found at Oxyrhynchus, Upper Egypt, about twenty-five years ago. Oxyrhynchus, ostraca and leopards shed more light upon the wonderful history of our scripture writings.

In 1908 a very old manuscript was purchased by C. L. Frey, of Detroit, from an Arab dealer in Cairo. This is known as the Washington or W manuscript. It is in the Smithsonian Institution at Washington, D.C. It has the western order for the gospels, that is Matthew, John, Luke and Mark. In Moffat's new translation of the New Testament the ending of Mark is according to this manuscript belonging to Dr. Frey.

Though many of us, and rightly so, do not wish to depart from the beautiful and dignified language of the New Testament of Canonized 1811 version, yet we are feeling the need of a new version today. On looking in the front of our King James version we find: "Translated out of the original tongues; and with the former translations diligently compared and revised." With that yearning for truth which has been so evident in the past in the days of our forefathers so we shall draw nigh unto its light.

Frank Armitage is having a well drilled and a number of other improvements made to his property on Third avenue north.

## Provincial News

British Capital for Alberta  
Negotiations are now going forward in two large deals which are likely to bring a considerable amount of British capital to Alberta for investment. For some time Spillers, the large milling interests of Britain, have been negotiating for the investment of a large sum in the grain business of the province. This firm has already made an offer for the control of the Alberta Flour Mills Company of Calgary, with a view to completion of the large flour mill now in course of erection there. The firm is also interested in the purchase of a string of elevators through the Winnipeg area and is negotiating to erect a large motor elevator at Vancouver to handle western grain.

The other deal involves extensive Alberta coal properties, and is being negotiated in behalf of British capital by Capt. Henry Davies, O.B.E., of Cardiff, Wales.
